

Dear Hiring Manager,

I am writing to express my interest in joining your organization. With **9 years of professional experience**, including **4 years in the academic sector** and **5 years in the software development industry**, I have gained extensive experience in designing, developing, and maintaining software solutions that improve organizational processes and user experience.

Throughout my career, I have developed applications using **C# .NET Windows Forms**, **PHP Laravel**, **Microsoft SQL Server (MSSQL)**, and modern JavaScript technologies such as **Next.js**. I am experienced in the full software development lifecycle, including system analysis, database design, development, deployment, maintenance, and user support.

Some of the projects I have successfully completed include:

- **Guidance Information System** – Desktop and Web Application (**C# .NET Windows Forms**)
- **Library Login/Logout System** – Desktop Application (**C# .NET Windows Forms**)

These projects strengthened my expertise in software development, database management, troubleshooting, and delivering reliable solutions that meet organizational requirements.

I am also actively modernizing my previous systems by transitioning them into **Version 2** using **Next.js**. This migration aims to create lightweight, high-performance applications with lower infrastructure and maintenance costs while improving scalability and user experience.

In addition to my professional work, I continuously build personal and client projects using modern full-stack technologies. These projects utilize **Next.js**, **Supabase**, **Prisma ORM**, AI-assisted development with **Claude** (through effective prompt engineering), and are deployed on **Vercel**.

Some of these projects include:

- **Personal Portfolio Website** <https://portfolio-tyser1995s-projects.vercel.app/>
- **Kai3D Prints** – A small business website and management system for 3D printing services <https://3-d-printing-management-system.vercel.app/>
- **Human Resource Information System (HRIS)** – An ongoing project being developed for a private school using Next.js, Supabase, Prisma, and Vercel.

Through these projects, I continue to strengthen my skills in modern full-stack development, cloud deployment, database integration, authentication, file storage, and AI-assisted software development.

I am passionate about continuous learning and enjoy adapting to emerging technologies and best practices. I am confident that my combination of long-term professional experience, modern web development expertise, and commitment to delivering high-quality software would make me a valuable addition to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and technical skills can contribute to your organization's success. I look forward to the opportunity to speak with you.

Sincerely,

Resty Suriaga Galido
